Flexible first three months

Monthly for the first three months, with no long-term lock-in. At month three, both parties review the work, results, priorities and fit.

12 months by mutual agreement

If both parties are satisfied after the review, the preference is to agree a 12-month term so delivery time and resources can be reserved.

Separate costs and supplier continuity

Advertising media, website hosting, platform subscriptions and approved external specialist or development costs are separate. We will review the current local search package for duplication and coordinate the retention or transfer of hosting and technical support.

ADDITIONAL OUTCOMES

Marketing and automation can be added when useful.

If Solari & Stock would like additional marketing or automation outcomes, we are happy to discuss them. Where appropriate, they can be incorporated into this proposal at this stage, or scoped and presented as a separate proposal.

The annual comparison is indicative, not a guaranteed saving. Current Meta costs are unknown. The actual difference will also depend on supplier services retained after review and any separate hosting, platform subscription, specialist or development costs approved by Solari & Stock. GST treatment may vary between employment costs, professional fees and media costs.
